

CRIPPEN STYLE BALL TRAY

QC Screen Company is pleased to offer our customers Crippen Replacement Ball Trays.

QC ball trays feature the same high quality construction as our complete line of replacement screens. Our mortise and tenon joinery frames are constructed of premium quality kiln-dried lumber-ensuring a sturdy and durable frame. Add to this our heavy gage woven and inter-crimped ball retaining material, and you will have the highest quality, most capable ball trays available. Assembly ensures aggressive ball bounce that clears screens of debris and passes sifted products through with no place for hang-ups.

Highly abrasion resistant screener balls with long lasting bounce recovery make the complete system as efficient as possible. Contact us today to discuss the advantages of Quality Custom ball trays and see just how affordable the best can be.

Eccentric sleeves are also available when updating to ball trays from brush style machines.
